

As a general rule, Covenant Eyes does not want to bash other products in the marketplace, talking about what *we* have that *they* don't have. We believe the value of our product stands on its own.

Here are some of the main features our members love about us:

1. Web Rating System

Our [unique website rating system](#) looks a lot of like movie ratings or video game ratings. Every web address your device accesses is rated for inappropriate content, using ratings like T for Teen or M for Mature.

2. Easy-to-Read Reports

Our users often comment how much they enjoy the tidiness of [our reports](#). They are easy to scan for questionable material.

3. Easy-to-Scan Subject Lines

When Accountability Partners receive a Report, an overall rating for the report is included in the subject line (phrases like “Report Looks Good” or “Close Review Recommended”). This helps Partners know at a glance how closely they need to look at the Report.

4. Report Accuracy

Because of our web rating system, Covenant Eyes doesn't just catch the blatantly bad websites, but also the “[gray areas](#).” Accountability partners can see if mature material was accessed, even if it isn't pornographic.

5. Ability to Customize Reports

[Internet Reports can be customized](#) in several ways.

- a. Partners can choose how frequently the Reports are e-mailed to them.
- b. Partners can change the sensitivity of the Reports based on the age of the user.
- c. Partners can choose specific information they want to be able to see on Reports (like web searches, highly rated websites, average hourly usage, etc.).
- d. Partners can [generate Reports online](#) 24/7 with their own custom date ranges.

6. Difficulty to Bypass

Users can't uninstall the software without their Accountability Partners being notified. Covenant Eyes also covers every browser on your computer and has its own browser for iOS devices. Plus, a *complete* list of every web address accessed is available online 24 hours a day.

7. Mobile Apps

Covenant Eyes has a [monitored browser for the iPhone®, iPad®, and iPod touch®](#). There is also an [Android™ app](#) that monitors your device's stock browser and the amount of time other apps are used. (*Update for April 2014: The Android app now has the ability to [lock down other apps on the device](#).*) Covenant Eyes apps are free, included as a part of your membership.

8. Fantastic Customer Support

Covenant Eyes has [free phone technical support](#) for all services on all devices. Our members regularly thank us for our excellent customer service. We are here to help however we can.

About the author, Luke Gilkerson

Luke Gilkerson is the Educational Resource Manager at Covenant Eyes. Luke has a BA in Philosophy and Religious Studies and is currently working on an MA in Religion. He is the author of [Coming Clean: Overcoming Lust Through Biblical Accountability](#) and [The Talk: 7 Lessons to Introduce Your Child to Biblical Sexuality](#). Luke and his wife Trisha blog at [IntoxicatedOnLife.com](#)
